3) Changement de varioble
Cas général
Bet Délant deux compacts sumples, soit $\phi: \Delta \xrightarrow{\sim} D$ $(u;v) \rightarrow (x(n;v); y(n;v))$
Si on mote $ J_{\phi}(u;v) $ Povaleur absolue du Jarohien, on a: $ J_{\phi}(u;v) = \partial_{\phi}(u;v) $ $ \partial_{\phi}(u;v) $
App Chant de vouers des les intégra les dous les
avec les les hypothèses prétédents, on a:
) & S(x;4) dxdy = \[\int \frac{1}{2} \left(\text{(u, v 1; y (u; v))} \] \] \[\frac{5}{6} \left(\text{uv} \right) \right] du dv
Cas particulier
Passay en coordonnées peravos: [x=ncosa y-nxio
$\iint_{S} d(x, y) docdy = \iint_{P} \int (n \cos \alpha + n \sin \alpha) d\alpha d\alpha$
$ S = \begin{vmatrix} \frac{\partial x}{\partial r} & \frac{\partial z}{\partial r} \\ \frac{\partial y}{\partial r} & \frac{\partial y}{\partial r} \end{vmatrix} = \frac{\cos \alpha}{\cos \alpha} - \frac{\pi \sin \alpha}{\sin \alpha} = \frac{\pi \cos^2 \alpha + \pi \sin^2 \alpha}{\sin \alpha} = \frac{\pi \cos^2 \alpha + \pi \sin^2 \alpha}{\sin \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = \frac{\pi \cos^2 \alpha}{\cos \alpha} + \frac{\pi \cos^2 \alpha}{\cos \alpha} = $
doedy=ndrda
2)
Convention: Si Destinonment simple, on note 20
Convention: Si Destinoqual simple, on note &s
